Christmas 2013

Dear Pharmacist,

Survey on abortifacients/contraception in Pharmacies - PLEASE RETURN

We have all been shocked at recent reports of chemical warfare used on children in the Middle East. No less shocking is the attack on human life by chemical abortifacients, morning-after pill, intra-uterine devices and other contraceptive products.

As a pro-life, pro-family organisation, we are CONSTANTLY asked: “Do you know even one pharmacy in the country that does NOT dispense abortifacients/ contraceptive products?”

Many of our supporters (14,000 on our database) have stated they would travel even long distances to patron such a pharmacy or order by mail permitted pharmacy products from such pharmacies.

We are conducting a **nationwide survey** on behalf of our supporters to map pharmacies which do not dispense / sell / deal with abortifacients / contraceptives.

I would be delighted if you would indicate on enclosed form whether or not your pharmacy deals in these products. Please do indicate if you would like our supporters and the wider community to know if you would be pleased to supply permitted products by mail order.

Patrick McCrystal BSc Pharmacy (QUB), MPSI, is our Executive Director, and his testimony of how he ceased dispensing contraceptive abortifacient drugs is enclosed. Three other pharmacist's stories are included.

Please see our website www.positivepharmacy.org provides further information for pharmacists and healthcare professionals on this ethically challenging subject.

I look forward to hearing from you.
Sincerely,

Patrick G Buckley
Chairman,
Human Life International (Ireland)
